

Underpinned by fundamentals that mirror some of the most successful NFT collections, NAKA Punks are a collection of 10,000 rare and unique NFTs released by the Nakamoto Games ecosystem. The NAKA Punks represent more than an NFT collection. They are a decentralized asset that allows the holder to benefit from both the success of the Nakamoto Games ecosystem and its unique Metaverse environment, the NAKAVERSE. Here's how NAKA Punks fare against some of the most prominent NFT collections.

TABLE 1: NAKA PUNKS VS PROMINENT NFT COLLECTIONS

Name	Supply	Mint Value	Floor Price	Multiple from minting	Highest selling Price for 1 NFT
Punks	10K	\$200	\$200	Undefined	Undefined
CryptoPunks	10K	\$ 0	\$131,773	Undefined	\$11.75 Million
BA 🎒 YC	10K	\$124	\$145,390	1172x	\$3.4 Million
AZUKĘ	10K	\$1540	\$17,341	11x	\$1.4 Million
GLUNE	20K	\$80	\$17,031	212x	\$140K
COOL CATS	9,941	\$50	\$6,193	123x	\$1.42 Million

WHAT ARE THE KEY ATTRIBUTES OF THE NAKA PUNKS?

The NAKA Punks are a collection of 10,000 punk-like characters that vary in their attributes and rarity. The Punks will vary in their attributes and rarity and there will be fifty ultra-rare gold-skinned releases within the 10,000. Every NFT within the collection is unique and will have distinct attributes which give it a certain degree of rarity within the collection. The rarity of any given NFT within the collection can be assessed through a rarity calculator which will be available on the NAKA Punks website. While the collection is premised on the idea of the first-ever NFT collection, the **Crypto Punks**, it also integrates airdrops and upsides from the Nakamoto Games ecosystem and other leading blockchain projects. This is detailed further in "NAKA Punk Holder Privileges".

WHAT'S NAKAMOTO GAMES?

Nakamoto Games is a premier play-to-earn ecosystem that is offering gamers worldwide a versatile and ever-expanding suite of gaming options. Nakamoto Games has become one of the leading providers of play-to-earn and Metaverse gaming options and continues to build its user base and audience through cutting-edge gaming releases and insightful content.

NAKA PUNK HOLDER PRIVILEGES.

NAKA Punks is a rare NFT collection that provides holders with the option to receive other valuable assets due to their ownership of this rare NFT. Owners of NAKA Punks can receive an airdrop of a real estate or building in the NAKAVERSE valued at \$500, 2.5x the initial minting value of the NAKA Punks. NAKA Punk holders will become members of the Satoshi Gaming Club which will allow them to receive airdrops and private sale access in innovative emerging blockchain gaming projects. NAKA Punk holders will also be distributed a share of the profit from the Nakamoto Games ecosystem on an ongoing basis, directly tying ownership to the success of the rapidly growing play-to-earn ecosystem.

MINTING DETAILS AND BUYBACK CLAUSE.

NAKA Punks can be minted for \$200. Nakamoto Games has also gone a step further to ensure that NAKA Punks are a risk-free endeavor for anyone who is involved in the minting process by introducing a buyback clause. NAKA Punks can be sold back to Nakamoto Games exactly one year after minting at the initial minting price. The buyback is only eligible as long as the airdrops and land associated with the NFT has not been claimed over the course of the year. You can get in touch with the Nakamoto Games team to get involved in the minting process.

PRICE PROSPECTS.

NAKA Punks shares many of the attributes of the leading NFT collections but also integrates key links to value within the Nakamoto Games ecosystem and beyond. Based on historical multiples, the value of NAKA Punks could conservatively be estimated to increase 10x and with favorable market dynamics, values could surpass 100x and beyond. Every minter will have an equal chance of generating one of the fifty ultra-rare NAKA Punk releases which are expected to trade at a huge premium to other releases. On top of this, NAKA Punk holders have access to the airdrops of assets which are also highly susceptible to price rises as NAKAVERSE adoption becomes more widespread.
